

ROD-LOCK®

The BOP
that Clamps

Key Features

- Lock Out Clamp
- BOP
- Flow Tee

Benefits

- Service a drive or stuffing box on a live well
- Remove a drive without a rig
- Flange mount drives can be used
- Lockout bolts eliminate safety chains
- Reduce rig costs
- Enhance safety

OILLET

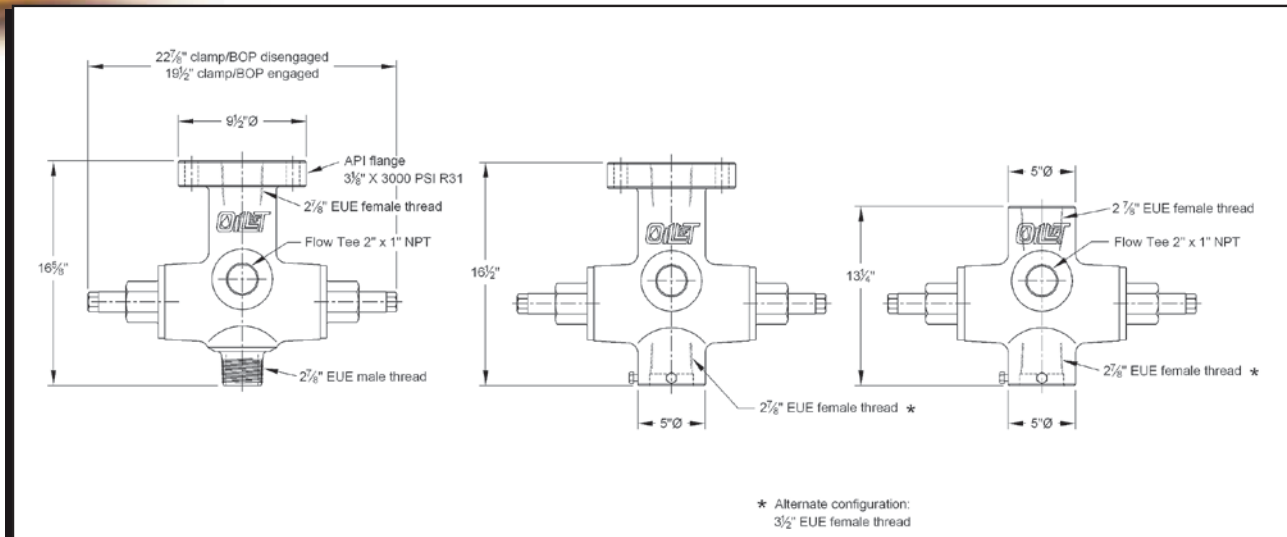

Technology Inc

A DOVER COMPANY

The Problem Solver

ROD-LOCK[®] The BOP that Clamps

Reduces Costs

- Service a stuffing box or drive head on a live well without gas or liquid leakage
- Use a crane truck instead of a rig to replace a PC drive or service a stuffing box
- A top mounted Oil Lift stuffing box can be serviced by a man without a crane truck
- Remove a drive head and leave well head and polished rod isolated and secured
- Reduce rig time

Specifications

- Rated at 25,000 pounds of polished rod weight based on 800 ft-lb torque on clamp bolts. Proof load is 40,000 pounds without slipping.
- Proof torque 1000 ft-lb
- Pressure balanced for low actuating torque
- BOP seals rated at 3000 psi
- Through bore 2 1/2" or 3 1/8" depending on configuration
- Optional connections
- 2 7/8" or 3 1/2" EUE Female Bottom with 3 1/8" 3000# flanged top
- 2 7/8" EUE Male Bottom with 3 1/8" 3000# flanged top
- 2 7/8" or 3 1/2" EUE Female Bottom with 2 7/8" EUE Female Top
- 2" NPT x 1" NPT or 3" NPT x 2" NPT side outlet connections

Enhances Safety

- Eliminates having to suspend a PC drive on the winch line while holding the polished rod weight on the draw works line
- No need for someone to work under a suspended drive head to install or remove a hinged polished rod clamp
- The polished rod is locked out and cannot move while someone is changing sheaves or working on the drive system
- Lock down bolts on female version eliminates safety chains
